*Monday to Friday from 09.00-12.00 hrs.
or by appointment.*

When visiting our Experience Centre you can choose from more than 17 different qualities and thicknesses of mattresses. It is always wise to first make an appointment for a visit. In this way we can be of the best service to you.

Sleeping comfort for Pleasure and Superyachts

Neptune mattresses have been specially developed to offer optimum comfort and support for all persons on board. In combination with our custom-made slat systems, mattress protectors, bedding and luxury bed linen, you will have everything you need for the perfect night's sleep on board!

Approximately 30% of your time on board will be spent sleeping in your bed. And, we feel that's too long to tolerate any discomfort.

Everything Neptune produce is made-to-measure because everything is precisely aligned to the size, shape and angle(s) of your bed frame.

*'Experience a wonderful
night's sleep on a Neptune'*

The very best mattresses, *handmade* in Holland.

Complete Experience Centre

Our Experience Centre / showroom in the heart of Palma de Mallorca displaying 17 different mattress quality choices, slat systems, bed linen and more.

The perfect solution

A comfortable Neptune mattress on a Neptune flexible slat system

Keeping our customers safe, comfortable, legal & ethical.

Visit our showroom to receive more product information.

Sleeping on a Neptune means choosing the very best.

A Neptune mattress is manufactured from only the most comfortable, durable and healthy materials. Each mattress is provided with a high quality, fire-retardant blue or off-white mattress cover (ticking) with an Airflow™ border. As a result, our mattresses offer unrivalled comfort, support and ventilation. In combination with the Neptune slat system, you will create the perfect sleeping place on-board.

Neptune Mattress Model Range:

Study carefully our mattress categories.

Choosing a mattress based on price alone can be a false economy.

"Comfort Line" Pantera® Nautic

Specially developed for yachting industry and has *antibacterial properties*. This premium comfort foam is also fire-retardant and meets the strict IMO standards. If you want to look after your crew, this should be the minimum quality model chosen.
[\(page 6\)](#)

"Comfort Plus Line"

This premium comfort foam is also manufactured with a finishing layer of 3cm. 100% Vita-Talalay latex Soft or 3cm Vita Embrace memory foam. A dream for the entire crew. If you love your crew, this is the model for you!
[\(page 7\)](#)

"Comfort Plus Line" PREMIUM

The Neptune "Comfort Plus" *Premium* Line are produced from a selection of multiple premium comfort foams. The standard model for Guest and Captains cabins, this should be the minimum quality model chosen.
[\(page 8\)](#)

"Excellent Line" 100% Vita-Talalay latex

Inspired By Nature, Nourishing Healthy Sleep. Transforming mother nature's gift into the most natural material inside mattresses. The standard model for Guest, V.I.P. and Owners cabins, this should be the minimum quality model chosen.
[\(page 9\)](#)

"Excellent Line" Pocketspring / Talalay latex

Mattresses are provided with "soft touch" pocket springs. The mattress is finished with 4cm 100% Vita-Talalay latex. The standard model for Guest, V.I.P. and Owners cabins. this should be the minimum quality model chosen.
[\(page 10\)](#)

“Comfort Line” Mattresses

The mattresses from the Neptune “Comfort” Line are produced in one quality, Premium *Lastilux* / Cold Foam or *Pantera® Nautic*. They are available in multiple supports, thicknesses and can be manufactured to fit any size, shape or angle(s) of the bed frame.

New in our collection is the *Pantera® Nautic* mattress. The *Pantera® Nautic* mattress has been specially developed for yachting industry and has *antibacterial properties*. Unlike conventional polyurethane foams, the cores will not go moldy (a big problem on board many yachts) *Pantera® Nautic* is also dust mite resistant. This comfort material is ideal for people with allergies. This premium comfort foam is also fire-retardant and meets the strict IMO standards. We offer a *7-year warranty* on *Pantera® Nautic*. This quality should be the standard for every crew member on board. A dream for the entire crew.

- Available qualities:**
- Coldfoam 40kg/m³ Medium / Firm *Our budget quality*
 - Coldfoam 50kg/m³ Medium
 - Coldfoam 55kg/m³ Firm
 - *Pantera Nautic* 50kg/m³ Medium / Firm

Available core thicknesses: 8cm / 10cm / 12cm / 15cm / 18cm
Recommended minimum thickness: 15cm
The chosen thickness of the mattress core has a strong influence on the quality. The thinner the mattress, the firmer it must be. Custom size thicknesses are of course possible.

“Comfort Plus” Line Mattresses

The Neptune “Comfort Plus” Line mattresses are produced from one premium quality Cold Foam *Pantera® Nautic* with a 3cm thick 100% *Vita-Talalay* latex top layer and can be produced to fit any shape, size or angle(s) of the bed frame. The *Pantera® Nautic* mattress core has been specially developed for yachting industry and has *antibacterial properties*. Unlike conventional polyurethane foams, the cores will not go moldy (a big problem on board many yachts) *Pantera® Nautic* is also dust mite resistant. This comfort material is ideal for people with allergies. This premium comfort foam is also fire-retardant and meets the strict IMO standards. The finishing layer is made of 3cm 100% *Vita-Talalay* latex Soft or 3cm 100% *Vita Embrace* memory foam. We offer a *7-year warranty* on this combination.

“Comfort Plus” Standard:

Available in two thicknesses: 15cm and 18cm and in four different compositions:

- Available qualities/supports:** Medium / Firm
Available quality top layer: 100% *Vita-Talalay W6S* Soft
Available quality top layer: 100% *Vita-Talalay Embrace* memory foam
Available core thickness: 15cm (12cm *Pantera® Nautic* + 3cm *Vita-Talalay* top layer)
Available core thickness: 18cm (15cm *Pantera® Nautic* + 3cm *Vita-Talalay* top layer)

Recommended minimum core thickness: 15cm
The chosen thickness of the mattress core has a strong influence on the quality. The thinner the mattress, the firmer it must be.

“Comfort Plus” PREMIUM Line Mattresses

The Neptune “Comfort Plus” Premium Line mattresses are produced from one premium quality Cold Foam *Pantera® Nautic* with multiple finishing layers and can be produced to fit in any shape, size or angle(s) of the bed frame. The *Pantera® Nautic* mattress core has been specially developed for yachting industry and has *antibacterial properties*. Unlike conventional polyurethane foams, the cores will not go moldy (a big problem on board many yachts) *Pantera® Nautic* is also dust mite resistant. This comfort material is ideal for people with allergies. This premium comfort foam is also fire-retardant and *meets the strict IMO standards*.

The Neptune “Comfort Plus” Premium Line mattresses are produced from a selection of multiple premium comfort foams. This base of 11cm thickness is provided with 1cm of EZ-Dry (a comfort foam with a very open cell structure) then 3cm of Vita-Talalay Embrace memory foam and finished with a top layer of 3cm of Vita-Talalay latex soft. This structure has fantastic ventilation and comfort properties. We offer a *7-year warranty* on this combination.

Composition

Base:	11cm <i>Pantera® Nautic</i>
First intermediate layer:	1cm EZ-Dry for greatly improved ventilation
Second intermediate layer:	3cm 100% Vita-Talalay memory foam
Third and also top layer:	3cm 100% Vita-Talalay W6S Soft
Available core thicknesses:	18cm (11cm+1cm+3cm+3cm top layers)
Available supports:	Medium / Firm

“Excellent” Line Mattresses (full 100% Vita-Talalay latex)

The most superior model in our range

Inspired by Nature, Nourishing Healthy Sleep. Transforming mother nature’s gift into the most natural material inside mattresses and mattress toppers. Neptune Excellent Line mattresses are manufactured of one or more qualities of 100% *Vita-Talalay latex* and can be produced to fit in any shape, size or angle(s) of the bed frame. The round open-cell structure of Vita-Talalay latex is unique and unrivalled and offers optimum ventilation. This mattress ensures good moisture and heat regulation. As a result, *mold cannot develop* (a big problem on board many yachts) and this product is also dust mite resistant so it’s ideal for people with allergies. This helps people sleep better, more hygienically and healthier. The mattresses have a superior resilience and provide optimal support. Vita Talalay is the best and healthiest latex material available on the market today and is *EXCLUSIVE to Neptune*. We offer a *7-year warranty* on this combination.

Manufactured from one or more qualities of 100% Vita-Talalay latex.

Available core thicknesses:	Recommended supports:
12cm	: Firm or Extra Firm
15cm (12cm + 3cm top layer)	: Medium / Firm / Extra Firm
18cm (15cm + 3cm top layer)	: Soft / Medium / Firm / Extra Firm
20cm (16cm + 4cm top layer)	: Soft / Medium / Firm / Extra Firm

Available quality top layer:	100% Vita-Talalay W6S Soft top layer
Available quality top layer:	100% Vita-Talalay Embrace memory foam

Recommended minimum core thickness: 15cm
The chosen thickness of the mattress core has a strong influence on the quality. The thinner the mattress, the firmer it must be.

“Excellent” Line Mattresses (Pocket Spring + 100% Vita-Talalay latex)

Neptune Excellent Line mattresses are provided with “soft touch” pocket springs and equipped with a pressure distributor and can be produced to fit in any shape, size or angle(s) of the bed frame. The mattress is finished with 4cm 100% Vita-Talalay latex on both sides as a result, *mold cannot develop* (a big problem on board many yachts) and this product is also dust mite resistant so it’s ideal for people with allergies. This helps people sleep better, more hygienically and healthier. The mattresses have a superior resilience and provide *optimal support*.

The beams that are used around the pocket core are provided with extra aeration holes for optimum ventilation.

Minimum width for this type of mattress is 90cm wide, narrower has a strong negative influence on sleeping comfort. We offer a *7-year warranty* on this combination.

The disadvantages of a pocket spring mattress are:

- Mattress cannot be folded. Mattress may bend, for example, when using an adjustable sleep system but not folded double.
- The minimum thickness for an optimal result is 22cm.
- Minimum width is 90cm, if the mattress is narrower, you will not get the optimum comfort.

Composition

Available core thickness: 22cm / 24cm
Available supports: Medium / Firm

Recommended minimum core thickness: 22cm for adult people

Mattress Toppers

Neptune mattress toppers offer extra sleeping comfort on board and can be produced to fit in any shape, size or angle(s) of the bed. Because of the wide choice of different raw materials, a mattress topper helps to tailor the bed to individual sleeping needs and that gives an even better night’s sleep. A mattress topper helps to level the join between two mattresses. It can make a hard mattress softer. A mattress topper only makes sense if the mattresses are of a good quality.

NOTE:

1. In case of pit formation of existing mattresses, a mattress topper is useless.
2. A mattress topper can be a solution to sleep more softly.
3. On board the superyachts, guests are given an option for softer sleeping comfort.

“Comfort” line and “Excellent” line mattress toppers

“Excellent” line

Available quality: 100% Vita-Talalay latex
Available core thicknesses: 4cm / 6cm
Available supports: Soft / Medium

“Excellent” line

Available quality: 100% Vita-Talalay Embrace memory foam
Available core thicknesses: 4cm
Available supports: Memory foam (one quality)

“Comfort” line

Available quality: Pantera® Nautic premium cold foam
Available core thicknesses: 4cm / 6cm / 8cm
Available supports: Medium / Firm

Recommended core thickness: 6cm

The chosen thickness of the mattress topper core has a strong influence on the quality. The thinner the mattress, the firmer it must be.

Neptune mattress supports are made to measure

There are two ventilation options for under your Neptune mattress.

We recommend a Neptune slat system or at least an Airlift layer under each mattress!

1. Neptune custom flexible slat systems, which provides extra sleeping comfort and optimises ventilation. Depending on space available, a slat system can be made to any shape and size bed frame. The slats are 4cm in height.
2. Airlift ventilation material layer available in 10mm thickness.

Highly recommended under every mattress

Neptune Slat systems

Neptune slat systems allow air to freely circulate around your mattress so that perspiration moisture can be easily drained. The 30 laminated curved beech wooden slats also reduce pressure, which guarantees more comfort and also increases the lifespan of your mattress. The slats can be detached from each other with a simple click, allowing easy access to any storage underneath. With the patented slatted base of Neptune you are 4cm higher, which ensures perfect airflow and extra comfort.

Neptune Airlift

Airlift is an alternative option and protects against humidity and mold formation in the mattress cores. If a Neptune slat system cannot be used due to a height restriction in the bunk or cabin, then this layer provides ventilation.

Airlift is secured to the bottom of the mattress core. If Airlift is chosen, we also highly recommend to drill extra ventilation holes into the base of your bed frame.

Neptune fitted sheets made to measure

Neptune produce the perfect fitted sheet! Made to the exact contours of your mattress so no more loose or baggy bed sheets! Our sheets are made from 100% Egyptian cotton (300TC) and available in various nautical colors.

Neptune Bed linen is individually labelled per mattress and we include all the relevant product information on the label, for instance; yacht name, yacht type, cabin name or number, location, mattress model, quality, thickness etc.

Making the beds very simple with a perfect fit...

Colors

Neptune fitted sheets are available in colors: white, ecru, light blue, middle blue, dark blue, anthracite and black.

Quality

300 thread counts, 100% Egyptian cotton.

Tailored "Excellent"

Neptune "Excellent" fitted sheets are made to the exact contours of the mattress and our custom bed linen fits perfectly to any size or shape of bed.

Tailored "Comfort"

Neptune "Comfort" fitted sheets are made to the exact contours off the topside of your mattress, This is a simplified version.

Perfect fit and labeled

Bed linen is neatly labeled with all information about the relevant bed linen. Such as location of the mattress in question, name of the yacht, etc. As a result, any bed linen can easily find its way to the correct mattress.

A minimum of three pieces of bed linen per mattress are made, more is no problem, however less becomes too expensive in connection with the production process.

Neptune Head Pillows

A good night's sleep also starts with a great head pillow! Your pillow should absorb the pressure of the body parts and distribute it proportionately. All the nerves of the body pass through your neck vertebrae. It is therefore important that the neck and the head are fully supported in the correct way. Choose a head pillow with the right support, where the neck muscles and vertebrae can relax.

Visit our website for more pillow models.
→ www.neptune.nl/en/product-category/pillows-en/

Imperior

A combination of shape-retaining and the comfort of down. Natural Vita-Talalay latex has the Cradle to Cradle certificate and is the best latex for people and the environment. The core is interchangeable and has a satisfaction guarantee. The outer sides of the pillow are filled with 90% goose down which gives excellent moisture regulation. The ergonomic shape and neck recess provide perfect support. The batist woven 100% cotton cover makes the pillow very suitable for people with an allergy to dust mites.

Imperior Support

Extra Soft - Soft - Medium - Firm - Extra Firm.

The Talalay latex core can be replaced by a different quality if the hardness of the pillow does not suit.

Do you regularly have guests on board? Then opt to purchase a number of pillows in various supports, so the pillow they sleep on can be tailored to their individual needs. This attention to detail is always highly appreciated by the guests.

Neptune Duvets

Duvets come in several **qualities** and in various warmth classes. Neptune supplies handmade duvets manufactured in Holland. Filled with either Duck Down, Goose Down or the very luxurious Eiderdown. Duvets can also be made with wool, cotton, camel hair, cashmere and Technifill.

Duvets can be made to the size and shape of each bed and even follow the contours of your mattress.
